PROFESSIONAL SUMMARY

Motivated Information Science and Engineering student with hands-on experience in developing full-stack and AI-based applications. Skilled in Python, Java, SQL, and AWS, with knowledge of machine learning and web development. Passionate about solving real-world problems through technology and eager to contribute to a software engineering or AI/ML team while continuously learning and growing.

EDUCATION

Kalpataru Institute of Technology Tiptur	2027
<i>Bachelor of Engineering in Information Science and Engineering</i>	
Jawahar Navodaya Vidyalaya	2023
<i>Senior Secondary (CBSE)</i>	

PROJECTS

Disaster Monitoring and Alert System	Apr 2026
- Developed a disaster monitoring and alert system for earthquake and landslide risk analysis using AWS IoT Core to process 100+ sensor data points per minute. - Implemented real-time data processing using AWS Lambda, reducing alert generation time to under 5 seconds. - Built the backend using AWS DynamoDB to store sensor data and support an interactive monitoring dashboard for real-time monitoring and alert visualization. <i>Technologies & Tools Used : Python, AWS IoT Core, AWS Lambda, DynamoDB, Machine Learning</i>	
Driver Drowsiness Detection System	Nov 2025
- Built a real-time driver drowsiness detection system using Python, CNN, and OpenCV with 92% detection accuracy. - Improved eye-blink and facial feature detection using OpenCV and Haar Cascades, achieving smooth real-time processing at 30 FPS. - Implemented instant audio-visual alerts using Pygame, generating warnings within 2 seconds of detected driver drowsiness. <i>Technologies & Tools Used : Python, OpenCV, TensorFlow/Keras, Haar Cascades, Pygame</i>	
Sahay AI – AI-Powered Career Mentor	May 2026
- Developed an AI-powered career guidance platform using Python and Django to automate resume analysis and career guidance. - Built a Retrieval-Augmented Generation (RAG) pipeline using LangChain, FAISS, and Hugging Face models to deliver contextual AI chatbot responses. - Automated resume parsing and skill-gap analysis using NLP to generate personalized learning roadmaps for over 50 test profiles. <i>Technologies & Tools Used : Python, Django, NLP, LangChain, FAISS</i>	

SKILLS

Databases :	MongoDB, MySQL
Frameworks & Libraries :	React
Languages :	English, Hindi
Programming Languages :	Python, Java, C, JavaScript, SQL
Soft Skills :	Communication, Teamwork, Decision Making, Time Management, Leadership, Adaptability
Tools & Platforms :	Git, GitHub, VS Code

AWARDS & ACHIEVEMENTS

- Top 10 Finalist – Vibethon 2025, hosted at **Polaris School of Technology**.
- Attended **NAIN Project Seminar** focused on innovation and startup development.

CERTIFICATIONS

- Networking Basics – **Cisco**
- Introduction to Modern AI – **Cisco**
- Getting Started with AI – **IBM**
- Python Essentials 1 – **Cisco**
